

Clip-on contact springs are made of copper beryllium (CuBe) with a bright clean surface as standard. CuBe offers excellent electric and thermal conductivity in combination with a high material strength. On request a surface finish like tin-, zinc-, nickel-, silver- or gold-plating can be applied.

The standard program offers a huge variety of contact springs with different mounting methods and dimensions. The contact springs can also be cut to length.

- Different surfaces available
- Custom length available
- Mounting method: clip-on
- Excellent electric and thermal conductivity; high material strength
- Resistance to environmental influences and against corrosion
- High temperature resistance

## PRODUCT SPECIFICATIONS

PROPERTY	VALUE / TOLERANCE
Basic material	Copper beryllium (CuBe)
Surfaces	Blank, gold-, silver-, tin-, nickel-, zinc-plated
Density	8,36 g/cm <sup>3</sup>
Thermal expansion coefficient	17,5 x 10 <sup>-6</sup> m/m°C @ -20 °C – 200 °C
Thermal conductivity	105 W/m*K
Melting point	870 °C
Electrical conductivity	17 – 28 % – IACS*
Operation temperature	-30 -100 °C
Storage humidity	<50 HR

\* IACS: International Annealed Copper Standard

Please note: Picture only shows an example of a contact spring.

### BUILDING AN ITEM NUMBER

**FCB-XXX-YYY-XXF**

Contact spring CuBe	
Part number	
BL	Blank
AU	Gold-plated
AG	Silver-plated
SN	Tin-plated
NI	Nickel-plated
ZN	Zinc-plated
xxF	Number of fingers
xxx	Length (in mm)

### Standard options

**EXAMPLE**

**FCB-176-AU-22F**

Contact spring CuBe; contact spring number: 176; gold-plated; length: 22 fingers
